

Dynamic Car Control
NNAM Group Special Offer

Pulse Driver Training can provide a unique Dynamic Car Control Course. The course will give participants the chance to experience under steer, over steer, emergency manoeuvres and a high speed slalom course. The course will be held at Tibbenham Airfield on a course designed by Pulse to be challenging and fun.

This is what the course will cover:

Under steer - Drivers will discover what causes a car to under steer and how to correct and control this type of skid

Over steer – Drivers will get to experience over steer and learn how to control the skid and safely correct it.

Emergency Manoeuvres – Drivers will perform emergency stops at high speed with the ABS switched on and then with the ABS switched off to show the difference. Drivers will get to practice the correct technique for braking without ABS. Drivers will also get to perform an emergency avoidance manoeuvre and discover what happens when an emergency stop is performed without the aid of ABS while having to avoid a hazard ahead and then how to do the manoeuvre correctly.

High Speed Slalom (time permitting) – Drivers will drive at speed along a slalom course and get to practice the lessons learnt about under steer and over steer.

This course is available at a special price to NNAM when several sessions are booked one after another on the same day.

Each session lasts 1.5 hours with 3 drivers per session

8 sessions per day = £50 per person

5 sessions per day = £55 per person

This course is designed to be an introduction to dynamic car control that will teach the basics of skidding and allow drivers to experience different skids in a safe environment. If participants wish to do the full Dynamic Car Control course they will be entitled to a discount of £50 off the full price. This is a special discount for NNAM members.
